

**For the village
by the village**

Update from Daventry District Council

We have received confirmation from Daventry DC that at its next full council meeting on the 4th June they will consider, and hopefully approve, our proposal to develop a Neighbourhood Plan. It has already passed the first hurdle which was a unanimous approval by Daventry's Strategy Committee and now all we await is the support of the full council.

Consultation, consultation and more consultation

For us consultation with all of you lies at the heart of the Plan. We really do mean it with our strap-line 'for the village by the village' as this is your plan; you will shape it with your views an opinion and we want to hear from you.

At the last Steering Group meeting held on the 12th May we spent the evening brainstorming all of the various individuals, groups, societies, businesses and others that

we want to talk to in a way that is meaningful for you. We've set up a Facebook page and have already scored a huge number of likes which is great but that's only the tip of the iceberg. We will have held our first evening presentation to the WI and we would be delighted to talk to any group or society that would like to find out more.

We are also committed to finding out the views of the groups whose voice is not often heard – particularly the younger members of the community. It would be great if you could give us ideas or suggestions on what we can do to make sure your views on the future of Flore are heard?

There will be other ways in which we communicate and we would like to hear from you? Please email Tom Higginson with your thoughts? Tom.higginson@me.com

Launch event

On the basis of being the eternal optimists we have booked a launch consultation event on 14 June 12 - 5pm where we want to see as many of you as we can and hear about your likes and dislikes on a variety of issues that the village faces, plus of course any others that you want to talk about. This is the first of a series of planned events the results of which will help set the direction that the plan will take.
